

SAFE FOR YOU. FOR YOUR FURNITURE. FOR THE ENVIRONMENT.

Surface disinfection is a key safety element today. For our furniture, please **use only** non-aggressive disinfectants based on a **1-2% solution of perhydrol with silver ions**, which will preserve the product life span and surface appearance.

Avoiding popular products based on concentrated **alcohol**, you not only protect your and your loved ones' health, but also prevent furniture damage and environment pollution.

Paged

In the production of our furniture we use ecological, environment-neutral stains and varnishes. By using the disinfectants we recommend above, you help us to protect the environment, you maintain the high level of product quality and the right to warranty service. **It is not worth risking – avoid alcohol-based cleaning agents.**
